Editor Playbook - Build Like Force Fighter

Read this section **before** filling any story cell. Gold reference game: **Force Fighter** (hand-authored labs, rewards, checkpoints). Your job is not “write 100 quizzes.” Your job is to **teach one idea in 10 gentle steps**, then the next idea, then a boss remix.

1. The big picture (what you are building)

Every ImpactX / GyanQuest subject is one **game**. Every game has the same skeleton:

Layer	Count	What it is	Example (Force Fighter)
Game	1	One subject, one coach, one mood	Force Fighter · Coach Force
Topic (Level)	10	One chapter of the subject	Level 1: <i>The Lazy Rock</i> (inertia)
Subtopic (Step)	10 per topic	One bite of that chapter	Step 3: <i>Force or Not?</i>
Level quiz	after 10 steps	Prove this chapter stuck	2-3 kid-friendly questions
Reward	1 per topic	Badge / title for finishing	<i>Rock Rookie</i>
Boss topic	Topic 10	Remix earlier chapters	<i>Force Boss</i>

Total per game: $10 \times 10 = 100$ subtopics (+ quizzes & reward names).

Critical rule: Step 10 of Topic 3 is *not* “hardest physics in the world.” It is “you own *this* chapter.” Difficulty rises **inside** a topic (gentle spiral), and topics themselves go from concrete → more abstract across the game.

2. Spiral curriculum - how to keep it healthy

We use a **Bruner-style spiral**: revisit ideas from concrete action → pictures/icons → light symbols/rules → synthesis.

Across the 10 topics (the whole game)

Topic band	Brunner stage	Editor feeling	What players should feel
1-3	Enactive (do / touch)	Hands, props, push/pull, sort piles	"I can <i>do</i> this"
4-6	Iconic (see / diagrams)	Arrows, scenes, compare panels	"I can <i>see</i> the pattern"
7-9	Symbolic (name / light formal)	Short rules, equations-lite, labels	"I can <i>say</i> the rule"
10	Synthesis (Boss)	Remix old topics, no brand-new chapter	"I can <i>use</i> everything together"

Inside each topic (the 10 subtopics)

This is the **Force Fighter spiral**. Copy it for every topic you write:

Sub	Role	Player feeling	What you must design
1	Hook	"I already know this feeling"	Familiar everyday moment + coach warm invite
2	Watch	"Oh, that's what it looks like"	Demo / 3D scene / reveal - <i>observe first</i>
3	Sort	"I can tell them apart"	Real vs fake · is-it / isn't-it drag
4	Try	"I did it myself"	Hands-on lab (tune, push, build, place)
5	Explain	"I can say why"	Chain of everyday stories that share one cause
6	Name the rule	"That's the pattern / law"	Light formal naming - still kid voice
7	Stretch	"It still works here"	New context or extreme case (space, monsoon, big scale)
8	Myth bust	"I won't fall for that trap"	One common misconception - crush it kindly
9	Drill	"Fast and confident"	2-4 quick checks, no new content
10	Mastery	"This topic is mine"	Mini-boss for <i>this</i> topic only

Spiral health checks (do these every topic):

1. Subs 1-4 never require a formula the player hasn't *felt* yet.
 2. Sub 6 names something they already *did* in 1-5 - don't dump a textbook definition cold.
 3. Sub 7 is a *new place*, same idea - not a new chapter.
 4. Sub 8 fights a *real* student myth (ask a teacher / remember your own confusion).
 5. Sub 9 introduces **zero** new vocabulary.
 6. Sub 10 only remixed this topic's idea - save cross-topic remix for Topic 10 Boss.
-

3. How to make each sub-level (step-by-step recipe)

For **every** subtopic cell, write a **Story Card**. Use this exact template in the *Editor story notes* column (or a side sheet):

Story Card template (copy-paste)

```
SUB: [Topic name] · Step [1-10] · [Subtopic title]
GOAL (1 line): After this step the player can...
HOOK (everyday, BD-friendly): ...
COACH SAYS (1-2 sentences, kid voice): ...
PLAYER DOES (one clear action): watch / drag / tap / tune / order / quiz /
build ...
SCENE / PROPS (what appears in 3D or panel): ...
WIN CONDITION (how we know they got it): ...
FAIL / HINT (gentle, not shame): ...
MYTH TO AVOID (esp. steps 8 & 10): ...
NEXT BEAT (how this sets up the next step): ...
```

Recipes by step number

Step 1 - Hook

- Open with a *felt* moment (door push, rickshaw brake, phone unlock, half a roti...).
- Coach invites; do **not** lecture.
- Win = player continues after noticing / tiny tap.
- Force Fighter vibe: *Wake the Sleepy Rock*.

Step 2 - Watch

- Demo or 3D dwell: player *looks* before they act.
- Point out 1 thing to notice ("orange tire glides steadily").

- Win = watched + tapped Continue (timer ok).
- Activity types: `demo`, `scene3d`, `reveal`.

Step 3 - Sort

- 4-6 chips: half belong, half don't.
- Labels must be kid-clear ("Force" vs "Not a force").
- Win = all chips in correct zones.
- Activity type: `drag`.

Step 4 - Try

- One interactive lab: slider, push button, place object, flip switch.
- One success criterion (reach target, match pair, light the bulb).
- Keep controls to **one idea**.
- Activity types: `tap`, `drag`, custom lab.

Step 5 - Explain

- 3 everyday beats that share the same cause.
- Player unfolds or orders the story.
- Win = correct order / all reveals seen.
- Activity types: `reveal`, `order`.

Step 6 - Name the rule

- Give the *short* name after they felt it ("Law of inertia", " $F = ma$ idea", "SELECT picks columns").
- Optional: arrange word tokens into a sentence.
- Still playful - no exam tone.
- Activity types: `equation`, `order`, `quiz`.

Step 7 - Stretch

- Same rule, weird or big context (deep space, cyclone prep, hospital, village solar...).
- Win = apply the familiar rule correctly in the new scene.
- Do **not** introduce a second major concept.

Step 8 - Myth bust

- State the myth in student words ("Motion itself is a force").
- Prove it wrong with a sort or one decisive demo.
- Coach stays kind: "Lots of people think that - here's the trap."

Step 9 - Drill

- 2-4 rapid questions or micro-tasks.
- Only vocabulary from steps 1-8.
- Win = threshold score (e.g. 2/3).
- Activity type: `quiz` / short `tap`.

Step 10 - Mastery (topic mini-boss)

- Short gauntlet remixing *this* topic's hook + rule + myth.
- End with reward teaser ("You earned Rock Rookie!").
- Activity type: `boss` (or multi-part lab).

Engine activity types (what the code already supports)

Use these names when you hand off to developers:

Type	Best for steps	Player action
<code>demo</code>	1-2	Watch a scripted moment
<code>scene3d</code>	2, 7	Explore / notice the 3D scene
<code>reveal</code>	2, 5	Tap through example cards
<code>drag</code>	3, 4, 8	Sort chips into zones
<code>order</code>	5-6	Put steps / tokens in order
<code>equation</code>	6	Build a light formal sentence
<code>tap</code>	4, 9	Quick choices / buttons
<code>quiz</code>	9, level quiz	Multiple choice
<code>boss</code>	10, Topic 10	Harder check / synthesis

Default template cycle in generated games: `demo` → `drag` → `reveal` → `order` → `quiz` → `scene3d` → `equation` → `tap` → `drag` → `boss` **You may rearrange** to fit the spiral above - the spiral roles matter more than the type order.

4. How to organize everything properly

A. Folder-in-your-head (and in this document)

Game

├─ Topic 1 ... Topic 9 ← teach one idea each

├─ Topic 10 Boss ← remix only

|

Each Topic

├─ Intro line (kid voice) + emoji + reward name

├─ 2-3 everyday hooks (prefer Bangladesh-familiar)

├─ 10 Story Cards (subs 1-10)

└─ Level quiz (2-3 questions) after mastery

B. Naming rules (keep the catalog clean)

Thing	Rule	Good	Avoid
Topic title	Short, playful, memorable	<i>The Lazy Rock, Tiny Bits</i>	<i>Introduction to Newton's First Law</i>
Subtopic title	Verb or mission feel	<i>Force or Not?, Wake the Sleepy Rock</i>	<i>Sub-level 3</i>
Reward name	Title the kid earns	<i>Rock Rookie, Grip Guru</i>	<i>Badge 1</i>
Coach lines	Spoken, warm, short	"Push the sleepy rock!"	Walls of theory

C. Everyday hooks

- Prefer **Dhaka / Bangladesh** life when it fits: rickshaw, monsoon mud, Hilsa, Padma, school lab, cricket score, taka, cha in a bowl...
- Hooks must match props the player can *see* (bottle, cup, tire, desk...) when the game has 3D props.
- Every topic needs **at least 2** hooks before you write sub 1.

D. Topic 10 Boss rules

- **No new subject chapter.** Only remix Topics 1-9.
- Structure Boss steps as Challenge 1... Crown (already titled in this pack).
- End with celebration + "replay any mission" energy.

E. Checkpoints (optional, Force Fighter style)

Force Fighter places bigger checks after bands (e.g. after topics 3, 5, 10). If you add checkpoints: keep them **short**, celebrate progress, don't block joy.

F. Work order for editors (stay sane)

1. Play / skim **Force Fighter** Level 1 end-to-end.
2. For *your* game: lock the **10 topic titles** (already listed below).
3. Write **Topic 1** fully (10 Story Cards + quiz + reward) before Topic 2.
4. Peer-review Topic 1 against the spiral health checks.
5. Clone the rhythm for Topics 2-9; write Boss last.
6. Only then ask engineering to replace template steps with your stories.

G. Handoff to developers

When a topic is “ready,” deliver:

- Topic intro + everyday[] + rewardName + emoji
- 10 Story Cards (complete)
- Level quiz (2-3 items)
- Suggested activity `type` per step
- Prop / scene notes

Do **not** hand off half-filled topics.

5. Quality bar - “properly organized” checklist

Tick these before you mark a topic done:

Per subtopic

- ☐ Story Card complete (goal, hook, coach, action, win, hint)
- ☐ One job only - no double lessons
- ☐ Kid voice (age ~10-15 friendly; no jargon without a feeling first)
- ☐ Win condition is testable in-game
- ☐ Sets up the next step (spiral link)

Per topic

- ☐ Subs 1→10 follow Hook...Mastery roles
- ☐ Sub 9 has no new words
- ☐ Sub 8 kills a real myth
- ☐ Level quiz uses only taught ideas
- ☐ Reward name is fun and unique in this game

Per game

- ☐ Topics 1-3 concrete; 7-9 more formal; 10 remix only
- ☐ No topic steals another topic's main idea
- ☐ Coach personality consistent
- ☐ 100 Story Cards accounted for

Red flags (fix immediately)

- Jumping to formulas in Step 1-2
- Step 10 inventing a new chapter
- Three ideas crammed into one sub
- Shame-y fail text (“Wrong! You’re bad at science”)
- English-only elite examples when a local hook exists
- Copy-pasting the same story across five topics

6. Mini example (Force Fighter · Topic 1 energy)

Sub	Title	One-line goal
1	Wake the Sleepy Rock	Feel that still things need a push/pull
2	Low-Friction Glide Watch	See steady motion when friction is tiny
3	Force or Not?	Sort real forces from “just motion”
4	Wall Stop Surprise	Feel a force change motion
5	Everyday Motion Stories	Connect door / kick / van to the idea
6	Name the Law of Inertia	Give the pattern a name
7	Deep-Space Drift	Same law, extreme place
8	Myth Bust: Motion Isn’t a Force	Crush the #1 misconception
9	Inertia Speed Drill	Fast confidence
10	Rock Rookie Mastery	Own the chapter → earn reward

Steal this energy for Chemistry, Math, SQL, AI - different content, **same spiral spine**.

7. Your mission in this pack

1. Open your games listed below.
2. For each subtopic row, fill **Editor story notes** using the Story Card template.

3. Keep the spiral healthy (Section 2).
4. Use the checklists (Section 5) before marking a topic done.
5. When stuck, ask: “*What would Force Fighter do for Step N?*”
